Q1 Project Proposal

Title: Terra

Description: Terra is a website that aims to spread awareness about the current environmental issues that surround our planet and teach ways on how to take part in eliminating them. Recently, scientists have been warning us about how our global temperature can increase by 3.2 degrees Celsius in 2100 if we don't act on our global carbon emissions by 2025. This issue alone tells us the crucial need for global awareness about our environment. Awareness leads to learning, learning leads to action, and action leads to change. By spreading awareness, this website helps in sparking the desire to act and make a change among other people.
